

Insert end of yarn through spool from the top so end extends about 4". Wrap thread one around one of the pegs in a counterclockwise direction. Wrap remaining pegs in the same way, rotating spool as you proceed. When you are back at the first peg, wrap as prior, laying the yarn above the yarn already there. With the lifting tool, lift the bottom loop up and over the top yarn and over the peg. Repeat in a continuous fashion, the finish braid exiting from the bottom of the spool. To finish, take the working end and the thread through the last row of stitches and tie off.
